

Design and Technology

We aim for the children of Georgian Gardens to be able to have an enquiring mind, be creative and reflective. We want them to make connections to designs around them and have an understanding of the full design process from the point of discovering a need, planning, designing and creating.

Knowledge

Children at Georgian Gardens will:

- Understand if an object is good for the job chosen
- Know how to safely and accurately use equipment
- Understand how to reflect on their creation and suggest improvements

Skills

Children will develop a variety of skills including:

- The ability to look at existing products and evaluate their usefulness
- Being able to design things to solve a problem
- Use a variety of tools competently and safely
- Evaluate their own creations
